| Host                        | Goat                                                                                                                                                                                                                                                                               |
| Gene ID                     | 5968                                                                                                                                                                                                                                                                               |
| Gene Symbol                 | Reg2                                                                                                                                                                                                                                                                               |
| Species                     | Mouse                                                                                                                                                                                                                                                                              |
| Specificity/Sensitivity     | Detects mouse Reg2 in direct ELISAs and Western blots. In Western blots, approximately 50% cross-reactivity with recombinant mouse Reg1 is observed and less than 1% cross-reactivity with recombinant human (rh) Reg1B, recombinant rat (rr) Reg2, rrReg3 and rhReg4 is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant mouse Reg2<br>Asp35-Ala173<br>Accession # Q08731                                                                                                                                                                                               |
