| <b>Gene Symbol</b>                 | CCL17                                                                                                                                                                                                                                                                                                                                          |
| <b>Species</b>                     | Mouse                                                                                                                                                                                                                                                                                                                                          |
| <b>Specificity/Sensitivity</b>     | Detects mouse CCL17/TARC in direct ELISAs and Western blots. In direct ELISAs, approximately 25% cross-reactivity with recombinant human TARC is observed. Neutralizes the biological activity of recombinant mouse TARC, and will also neutralize the biological activity of recombinant human TARC using a 20 fold greater Ig concentration. |
| <b>Immunogen</b>                   | <i>E. coli</i> -derived recombinant mouse CCL17/TARC<br>Ala24-Pro93<br>Accession # Q9WUZ6                                                                                                                                                                                                                                                      |
