NB300-134

NF-M Antibody (3H11) - BSA Free

Product Information	
Unit Size	0.05 ml
Concentration	This product is unpurified. The exact concentration of antibody is not quantifiable.
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Clonality	Monoclonal
Clone	3H11
Preservative	5mM Sodium Azide
Isotype	IgG1
Purity	Unpurified
Buffer	50% PBS, 50% glycerol
Target Molecular Weight	145-160 kDa

Product Description	
Description	Novus Biologicals Mouse NF-M Antibody (3H11) - BSA Free (NB300-134) is a monoclonal antibody validated for use in IHC, WB and ICC/IF. Anti-NF-M Antibody: Cited in 2 publications. All Novus Biologicals antibodies are covered by our 100% guarantee.
Host	Mouse
Gene ID	4741
Gene Symbol	NEFM
Species	Human, Mouse, Rat, Porcine, Bovine, Chicken, Equine
Marker	Neuronal Marker
Specificity/Sensitivity	Specifically recognizes the medium neurofilament subunit (~145-160 kDa).
Immunogen	Recombinant fusion protein containing the extreme C-terminus of rat NF-M, amino acids 677-845, expressed in and purified from E. coli

Product Application Details	
Applications	Western Blot, Immunohistochemistry-Paraffin, Immunocytochemistry/Immunofluorescence, Immunohistochemistry, Immunohistochemistry Free-Floating
Recommended Dilutions	Western Blot 1:5000-1:10000, Immunohistochemistry 1:5000-1:10000, Immunocytochemistry/ Immunofluorescence 1:2000-1:5000, Immunohistochemistry-Paraffin 1:5000-1:10000, Immunohistochemistry Free-Floating 1:5000-1:10000
Application Notes	This 145-160kDa Neurofilament Medium antibody is useful for Immunocytochemistry/Immunofluorescence, Immunohistochemistry on paraffin-embedded sections and Western blot. *The investigator should determine the optimal dilution for a specific application.

Images

Western Blot: NF-M Antibody (3H11) [NB300-134] - Neuronal tissue lysates using mouse mAb to NF-M, dilution 1:10,000 in green: [1] protein standard (red), [2] rat spinal cord, [3] mouse spinal cord, [4] cow spinal cord, [5] rat sciatic nerve. Strong bands at ~145 kDa corresponds to rodent NF-M while that at about 160 kDa corresponds to the significantly larger bovine NF-M protein.

Immunohistochemistry Free-Floating: NF-M Antibody (3H11) [NB300-134] - Adult rat frontal cortex section stained with mouse mAb to neurofilament NF-M, dilution 1:5,000 in green, and costained with chicken pAb to neurofilament NF-H, dilution 1:5,000 in red. Following transcardial perfusion of rat with 4% paraformaldehyde, brain was post fixed for 24 hours, cut to 45µm, and free-floating sections were stained with above antibodies. NB300-134 antibody labels neuron cell bodies and dendrites of pyramidal neurons, as well as dendrites and axons of other neuronal cells, while the NF-H antibody stains the network of neuronal axons only.

Western Blot: 160kDa Neurofilament Medium Antibody (3H11) [NB300-134] - Rat spinal cord homogenate showing the major intermediate filament proteins of the nervous system (lane 1). The remaining lanes show blots of this material stained with various antibodies including NB300-134 (lane 3).
