Specificity/Sensitivity	This antibody is expected to recognize both reported isoforms (NP_932074.1; NP_149019.1).
Immunogen	Peptide with sequence C-QPEPIKTVWSIHY corresponding to C-Terminus according to NP_932074.1, NP_149019.1.

Product Application Details	
Applications	Immunohistochemistry-Paraffin, Immunohistochemistry, Peptide ELISA
Recommended Dilutions	Immunohistochemistry 4 - 6 ug/ml, Immunohistochemistry-Paraffin 4 - 6 ug/ml, Peptide ELISA Detection limit 1:32000
Application Notes	WB: Preliminary experiments gave an approx. 22 kDa band in human testis lysates after 1.5 ug/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 32.6 kDa band according to NP_932074.1 and 31.3 kDa band according to NP_149019.1. The 22 kDa band was successfully blocked by incubation with the immunizing peptide. However, literature reports a 36 kDa band in human and mouse testis scientific literature (PMID: 11390979). IHC-P: Human testis shows cytoplasm staining in spermatocytes, but not in spermatogonia.
