Product Application Details	
Applications	Immunohistochemistry-Paraffin, Immunohistochemistry, Peptide ELISA
Recommended Dilutions	Immunohistochemistry, Immunohistochemistry-Paraffin 1-2 ug/ml, Peptide ELISA Detection limit 1:32000
Application Notes	WB: Preliminary experiments gave an approx. 13 kDa band in human peripheral blood Lymphocyte lysates after 0.01 ug/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 22.6 kDa band according to NP_036224.1. The 13 kDa band was successfully blocked by incubation with the immunizing peptide. IHC: In paraffin embedded Human Lymph Node shows membrane staining just outside the mantle zone of the Germinal Centre.
