Details:

NOTE:- Dr Zhong (corresponding author) confirmed Novus Biologicals that the catalog number of SCARA5 antibody used in this publication is NBP1-77050. This SCARA5 antibody was used for IHC-P staining of paired samples of oral squamous cell carcinoma tissues (collected at Ninth People's Hospital, Shanghai Jiao Tong University School of Medicine). Sections were deparaffinized through heating the slides at 65 C for 2 hours and treatment with xylene, and the tissues were rehydrated with decreasing concentrations of ethanol. Rabbit polyclonal SCARA5 antibody was used at 1:500 dilution with 4C overnight incubation and then was visualized with DAB detection method via goat anti-rabbit secondary antibody. Positive expression grade and percentage scores were considered for evaluating SCARA5. The authors also used this SCARA5 antibody for WB analysis of 20-40ug lysates from clinical samples as well as from SCARA5 siRNA transfected HN13, HN30, and HIOEC cell lines.
