Images

Immunohistochemistry-Paraffin: ZNF891 Antibody [NBP1-90894] - Staining of human duodenum shows strong cytoplasmic positivity in glandular cells.

ChIP-Exo-Seq composite graph for Anti-ZNF891 tested in K562 cells. Strand-specific reads (blue: forward, red: reverse) and IgG controls (black: forward, grey: reverse) are plotted against the distance from a composite set of reference binding sites. The antibody exhibits robust target enrichment compared to a non-specific IgG control and precisely reveals its structural organization around the binding site. Data generated by Prof. B. F. Pugh's Lab at Cornell University.
