Images

Immunohistochemistry-Paraffin: BEND3 Antibody [NBP1-93585] - Staining of human cerebellum shows moderate cytoplasmic positivity in cerebellar tissue.

ChIP-Exo-Seq composite graph for Anti-BEND3 tested in K562 cells. Strand-specific reads (blue: forward, red: reverse) and IgG controls (black: forward, grey: reverse) are plotted against the distance from a composite set of reference binding sites. The antibody exhibits robust target enrichment compared to a non-specific IgG control and precisely reveals its structural organization around the binding site. Data generated by Prof. B. F. Pugh's Lab at Cornell University.
