Images

Immunocytochemistry/Immunofluorescence: NFIC Antibody [NBP2-37935] - Staining of human cell line MCF7 shows positivity in nucleus and nucleoli.

Immunohistochemistry-Paraffin: NFIC Antibody [NBP2-37935] - Staining of human stomach, upper shows strong nuclear positivity in glandular cells.

ChIP-Exo-Seq composite graph for Anti-NFIC (NBP2-37935) tested in K562 cells. Strand-specific reads (blue: forward, red: reverse) and IgG controls (black: forward, grey: reverse) are plotted against the distance from a composite set of reference binding sites. The antibody exhibits robust target enrichment compared to a non-specific IgG control and precisely reveals its structural organization around the binding site. Data generated by Prof. B. F. Pugh's Lab at Cornell University.
