| Host                        | Rabbit                                                                                                                                                                                                                                                                                                            |
| Species                     | Virus                                                                                                                                                                                                                                                                                                             |
| Reactivity Notes            | 0                                                                                                                                                                                                                                                                                                                 |
| Specificity/Sensitivity     | Avian Influenza A H7N9 Hemagglutinin (A/Shanghai/02/2013)                                                                                                                                                                                                                                                         |
| Immunogen                   | Antibody was raised against a synthetic peptide corresponding to 11 amino acids near the center of the H7N9 [Influenza A virus (A/Shanghai/02/2013(H7N9))] hemagglutinin protein. The immunogen is located within amino acids 260 - 310 of Avian Influenza A H7N9 Hemagglutinin. Amino Acid Sequence: GIQSGVQVDAN |
