Images

Western Blot: CYP7B1 Antibody (M17-P3F2) [NBP2-50217] - Western blot was performed using anti-Cytochrome P450 7B1 [M17-P3F2]. The left hand lane contains control cell lysate while the right hand lane contains lysate prepared from cells over-expressing the protein. ~15 micrograms of protein were loaded per well. No bands were detected with the negative control lysate, while a band migrating at the expected molecular weight was observed in the over-expression lysate.

Immunohistochemistry-Paraffin: CYP7B1 Antibody (M17-P3F2) [NBP2-50217] - Shows positive cytoplasmic immunostaining in normal liver (A) which is expected as CYP7B1 is involved in bile acid synthesis. Primary colorectal (B) and metastatic colorectal tumors (C) showed stronger staining compared to normal colon mucosa (D).
