Product Description	
Description	DyLight 650 is excited at 652 (in PBS) and emits at 672 (in PBS). DyLight 650 replaces DyLight 649.
Host	Goat
Species	Mouse
Reactivity Notes	Mouse. Minimum reactivity to human and rat.
Specificity/Sensitivity	Antiserum was solid phase adsorbed to ensure class specificity. Antiserum was cross adsorbed using human and rat immunosorbents to remove cross reactive antibodies. The antibody to mouse F(ab') ₂ was isolated by affinity chromatography using antigen coupled to agarose beads. F(ab') ₂ fragments were generated using a pepsin digestion. Fc fragments and whole IgG molecules have been removed. Fragments were conjugated to DyLight 650. Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG. By immunoelectrophoresis and ELISA this antibody reacts specifically with mouse F(ab') ₂ . No antibody was detected against non-immunoglobulin serum proteins. Less than 1% cross reactivity to human and rat F(ab') ₂ was detected. This antibody may cross react with F(ab') ₂ from other species.
Immunogen	Mouse IgG-F(ab') ₂ Fragment
Notes	DyLight (R) is a trademark of Thermo Fisher Scientific Inc. and its subsidiaries.
