| Gene Symbol                 | MED25                                                                                                                                                                                                                                                |
| Species                     | Human                                                                                                                                                                                                                                                |
| Immunogen                   | The immunogen is a synthetic peptide directed towards the N-terminal region of human MED25. Peptide sequence: EGLRKHYLLPAIEYFNGGPPAETDFGGDYGGTQYSLVVFNTVDCAPESYV The peptide sequence for this immunogen was taken from within the described region. |
| Product Application Details |                                                                                                                                                                                                                                                      |
| Applications                | Western Blot, Chromatin Immunoprecipitation (ChIP)                                                                                                                                                                                                   |
| Recommended Dilutions       | Western Blot 1.0 ug/ml, Chromatin Immunoprecipitation (ChIP)                                                                                                                                                                                         |

## Images

Western Blot: MED25 Antibody [NBP2-83188] - WB Suggested Anti-MED25 Antibody Titration: 0.2-1 ug/ml. ELISA Titer: 1:312500. Positive Control: Human heart

Chromatin Immunoprecipitation: MED25 Antibody [NBP2-83188] - Quiescent human colon carcinoma HCT116 cultures were treated with 10% FBS for three time points (0, 15, 30min) or (0, 30, 60min) were used in Matrix-ChIP and real-time PCR assays at EGR1 gene (Exon1) and 15kb upstream site.
