Images

Western Blot: MeCP2 Antibody [NBP3-05541] - Western blot analysis of tissue lysates using MeCP2 Antibody at a dilution of 1:1,000 in green: [1] protein standard (red), [2] rat whole brain, [3] nuclear fraction of rat brain, [4] mouse whole brain, [5] nuclear fraction of mouse brain lysate. Strong band at about 75kDa in rat and slightly lower in mouse nuclear enriched fractions corresponds to the MeCP2 protein. The same blot was simultaneously probed with chicken pAb to GAP-43 which detects GAP-43 protein in all preparations with apparent molecular weight of 43kDa.

Immunocytochemistry/Immunofluorescence: MeCP2 Antibody [NBP3-05541] - Immunofluorescent analysis of rat cerebellum section stained with MeCP2 Antibody at a dilution of 1:500 in red and costained with chicken pAb to calbindin at a dilution of 1:2,000, in green. The blue is DAPI staining of nuclear DNA. Following transcardial perfusion of rat with 4% paraformaldehyde, brain was post fixed for 1 hour, cut to 45uM, and free-floating sections were stained with the above antibodies. The MeCP2 antibody specifically labels nuclei of neuronal cells to a variable degree, while calbindin is expressed in the dendrites and perikarya of Purkinje cells in the molecular layer of cerebellum.
