Images

Western Blot: CNPase Antibody [NBP3-05551] - Western blot analysis of different tissue lysates using goat pAb to CNPase at a dilution of 1:5,000, in green: [1] protein standard, [2] rat brain, [3] rat spinal cord, [4] mouse brain, [5] mouse spinal cord, [6] cow spinal cord, and [7] pig spinal cord. Bands at 46kDa and 48kDa mark correspond to the two major isotypes of CNPase protein.

Immunocytochemistry/Immunofluorescence: CNPase Antibody [NBP3-05551] - Immunofluorescent analysis of a section of mouse striatum stained with CNPase Antibody at a dilution of 1:3,000 in green, and costained with rabbit pAb to NF-L at a dilution of 1:5,000, in red. The blue is Hoechst staining of nuclear DNA. Following transcardial perfusion of mouse with 4% paraformaldehyde, the brain was post fixed for 24 hours, cut to 45uM, and free-floating sections were stained with above antibodies. The CNPase antibody stains myelin sheath and the plasma membranes of oligodendrocytes, the myelin producing cells of the CNS. The NF-L antibody labels axons of neuronal cells enclosed by the myelin.
