NBP3-57717-1Set

IFN-alpha 1 Antibody Pair [Biotin]

Product Information

Unit Size	1 Set
Concentration	Concentration of individual antibodies may be found on the vial label. If unlisted please contact technical services.
Storage	Storage of components varies. See protocol for specific instructions.
Conjugate	Biotin

Product Description

Description	The kit contains a capture antibody, detection antibody, and recombinant protein standard for assay development, and these antibodies have been validated to function together in an ELISA format using the provided standard. Optimal buffers, antibody concentrations, incubation times, temperatures, and assay conditions have not been predetermined, allowing researchers to optimize assay sensitivity and dynamic range based on their specific sample type and experimental requirements. The quantities of kit components are not matched, and individual components may be purchased separately. This product is for research use only.
Gene ID	3439
Gene Symbol	IFNA1
Species	Equine
Assay Type	Sandwich ELISA
Suitable Sample Type	Cell culture supernatants. Can also be used in additional biological sample types reported in the literature, including serum, plasma, and tissue lysates, supporting a wide range of immunology, antiviral, and translational research applications.
Sample Volume	100 ul
