NBP3-57723-1Set

IL-21 Antibody Pair [Biotin]

Product Information	
Unit Size	1 Set
Concentration	Concentration of individual antibodies may be found on the vial label. If unlisted please contact technical services.
Storage	Storage of components varies. See protocol for specific instructions.
Conjugate	Biotin
Product Description	
Description	The kit contains a capture antibody, detection antibody, and recombinant protein standard for assay development, and these antibodies have been validated to function together in an ELISA format using the provided standard. The quantities of kit components are not matched, and individual components may be purchased separately. This product is for research use only.
Gene ID	59067
Gene Symbol	IL21
Species	Rabbit
Assay Type	Sandwich ELISA
Suitable Sample Type	Cell culture supernatants from rabbits (<i>Oryctolagus cuniculus</i>). Can also be used to measure IL-21 in a variety of biological sample types reported in the literature, including serum, plasma, whole blood, and tissue lysates from organs such as spleen, lymph nodes, lung, and intestine. While the kit is optimized for cell culture supernatants, minor modifications to the protocol may be required when in other sample types to ensure optimal sensitivity and accuracy, allowing researchers to adjust buffers, antibody concentrations, incubation times, temperatures, and other assay conditions as needed.
Sample Volume	100 ul
